

Title: Sail For A Swing
SN: 10/723,880

Examiner: Kien T. Nguyen
Art Unit 3712

In the Claims:

1. (currently amended) A swing and sail, comprising:
 - a) a swing that is suspended by at least two chains; and
 - b) a sail that is laterally disposed between said chains and above said swing, wherein a large plane of said sail is positioned generally vertically when said swing is static, and wherein said sail is mounted to each of said at least two chains by at least two lines that are attached to said sail, and wherein each of said lines is removably attached to said chains.
2. (original) A swing and sail as described in Claim 1, wherein a first end of said sail is attached to a first of said at least two chains, and a second end of said sail is attached to a second of said at least two said chains.
3. (original) A swing and sail as described in Claim 1, wherein said large plane of said sail is comprised of fabric.
4. (original) A swing and sail as described in Claim 1, wherein a substantial portion of said large plane sail is generally rectangular.
5. (original) A swing and sail as described in Claim 1, wherein said sail is mounted to one of said at least two chains near a left upper side of said sail, and near a left

lower side of said sail, and wherein said sail is mounted to a second of said at least two chains near a right upper side of said sail, and near a right lower side of said sail.

6. (original) A swing and sail as described in Claim 1, wherein said sail is mounted to each of said at least two chains at two points.
7. (canceled).
8. (currently amended) A swing and sail as described in Claim [7] 1, wherein said at least two lines are attached to said at least two chains by hook and loop material.
9. (currently amended) A swing and sail as described in Claim [7] 1, wherein said at least two lines are attached to said at least two chains by tying said at least two lines to said at least two chains.
10. (previously presented) A swing and sail as described in Claim 1, wherein said swing is a bench type swing, wherein said bench type swing provides seating for at least two people.

sail is laterally disposed between said chains, and above said swing, and below a member from which said at least two chains are suspended, and wherein said sail extends horizontally across substantially an entire distance between said chains, and wherein said large plane of said sail is comprised of fabric.

17. (new) A swing and sail as described in Claim 16, wherein said sail is mounted to each of said at least two chains by at least two lines that are attached to said sail.

18. (new) A swing and sail, comprising:

- a) a swing that is suspended by at least two chains; and
- b) a sail that is laterally disposed between said chains and above said swing, wherein a large plane of said sail is positioned generally vertically when said swing is static, wherein said swing is a bench type swing, and wherein said bench type swing provides seating for at least two people, and wherein said sail is laterally disposed between said chains, and above said swing, and below a member from which said at least two chains are suspended, and wherein said sail extends horizontally across substantially an entire distance between said chains, wherein said sail is mounted to each of said at least two chains by at least two lines that are attached to said sail.
